HIDDEN FASTENERS

CS CARBON STEEL | **SS** STAINLESS STEEL

CLIP & SCREW

The HULK Fasteners™ hidden clips and screws are shaded with a handsome dark hue and designed to work with grooved decking boards, such as those by Eva-Last®. The hidden clips and screws work together to provide an efficient, reliable attachment, and a flawless finish hidden from view.

S9 CLIP: For boards with a foot height of 9 mm and full height of 23 - 27 mm. Suitable for any structure.

S6 CLIP: For boards with a foot height of 6 mm and full height of 19 - 22 mm. Suitable for any structure.

SELF-DRILLING CLIP SCREW FOR METAL FRAMES:

- Handsome dark coating
- Carbon - 2000-hour C4 coating
- Carbon steel C1022

SELF-DRILLING CLIP SCREW FOR TIMBER FRAMES:

- Handsome dark coating
- Carbon - 2000-hour C4 coating
- Carbon steel C1022
- Stainless steel 316

HIGH TECHNOLOGY MATCHING SCREWS

Colour matching HULK top fixing and trim screws for use with wood or metal frames are available in a variety of natural shades, and offer a tough and durable protective coating. Marine grade stainless steel screws are recommended for Class 5 regions. Stainless or nanocoated carbon screws are best for Class 4 regions and include a 15-year warranty.

METAL DECK SCREWS

For fastening 20 - 25 mm thick composite deck boards onto metal frames without having to pre-drill unless specified by decking manufacturer. Suitable for metal structures of thicknesses up to 2.0 mm. Thereafter it is advisable to pre-drill. Detachable reamer wing is only operational in steel upward of 0.8 mm thick. For a tight grip ensure that the wing has broken off. Use the table below to help choose the HULK Fasteners™ screw that best matches your Eva-Last® decking or decking of similar colour.

TIMBER TRIM SCREW

Designed to fasten 10 -16 mm thick fascia or trim boards onto timber frames without having to pre-drill, unless otherwise specified by decking manufacturer. Thereafter it is advisable to pre-drill the composite only. Suitable for softwoods and most hardwoods. Use two or more screws per fastening line 30 mm from the edge of boards at appropriate spans in accordance with trim manufacturers guidelines.

Use the table below to help choose the HULK Fasteners™ screw that best matches your Eva-Last® decking or decking of similar colour.

METAL TRIM SCREW

For fastening 10 -18 mm thick composite and suitable wood fascia or trim boards onto metal frames without having to pre-drill unless specified by decking manufacturer. Suitable for metal structures of thicknesses up to 2.0 mm. Thereafter it is advisable to pre-drill. Detachable reamer wing is only operational in steel upward of 1.2 mm thick. For a tight grip ensure that the wing has broken off.

Use the table below to help choose the HULK Fasteners™ screw that best matches your Eva-Last® decking or decking of similar colour.
